

The NAB's request to limit XM Radio's services is just a desperate ploy to stifle competition and monopolize what the public listens to. As a subscriber to XM Radio, I feel that I am entitled to traffic, weather and news services. My job requires me to travel all over the United States, and with XM I have quick and easy access to the traffic and weather services that I need to plan my driving route and my day. Without XM, I would be trying to find this information by scanning through AM or FM stations, which in most cases would probably take a minimum of ten minutes to find and could cause me to be distracted from driving my vehicle. Please reject the NAB's petition 04-160 and let me listen to what I pay for with my own money.
